

FOR IMMEDIATE RELEASE

AirTest Technologies Appoints Ontario Sales Manager

DELTA, BC, August 9, 2016 –AirTest Technologies (TSXV:AAT) President George Graham is very pleased to announce the hiring of Paul D’arrigo as Ontario Sales Manager.

Mr. D’arrigo has extensive experience in the Ontario retail food industry, a major target market for AirTest. Following his introduction to AirTest, Paul quickly saw great potential in growing the sales of AirTest products in Ontario by leveraging his deep regional relationships. His management experience in retail and food facilities makes him ideally suited to interface with senior decision makers in commercial property management and present how AirTest Cleantech/Green technology products can save energy, provide an impressive return on investment, and significantly increase property value.

“Paul is uniquely suited to ensure widespread penetration of AirTest’s energy saving products to the very attractive market conditions that currently exist in Ontario” said George Graham. Ontario is an important market for AirTest as the company has a number of major customers who are actively installing AirTest control products into a wide variety of building types. For example AirTest CO₂ control products are currently being used for ventilation control in most Canadian Tire and Shoppers Drug Mart stores in Ontario. Ontario is also a prime market for growth of green and energy savings technologies due to very generous utility incentives and the Ontario Climate Change Action Plan that will commit up to \$8.3 billion as part of its five year plan where improving energy efficiency of buildings is a major target. AirTest has a number of products that can contribute to substantial reduction of energy use in new and existing buildings.

About AirTest: AirTest Technologies (www.airtest.com) is a Green-Tech company specializing in sensors that improve commercial building operating efficiency and at the same time create energy savings. These sensors are all based on technical innovations developed in the last ten years, and comprise a growing second wave of energy saving technologies that will make a significant contribution to Greenhouse Gas Reduction and Sustainable Buildings Programs. AirTest offers its products to leading-edge building owners, contractors and energy service companies targeting the buildings market. AirTest also provides energy cost reduction solutions

to building equipment and controls manufacturers who incorporate AirTest sensor components into their products.
